

Current Operations at Clinton-Sherman Industrial Airpark

The U.S. Air Force (USAF) uses Clinton-Sherman Industrial Airpark (CSIA) as an auxiliary training facility for Altus Air Force Base based KC-135, C-5, and C-17 aircraft, as well as T-37, T-38, and T-1 aircraft assigned to the USAF Air Education and Training Command. As the Federal agency that is currently the primary user of CSIA, the USAF has prepared numerous National Environmental Policy Act documents supporting their activities at CSIA. Therefore, the USAF will serve as a cooperating agency on the Oklahoma Spaceport Environmental Impact Statement.

Current civilian operations at CSIA include cross-country stopovers for refueling and maintenance. There are currently no civilian aircraft based at CSIA.

Types of Military Aircraft Using CSIA

Frequently Used Aircraft

C-5

KC-135

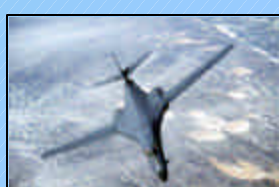

T-1

Intermittently Used Aircraft

C-17 Globemaster

B -1

C-130

T-38

Types of Civilian Aircraft Using CSIA

Beech King Air

Cessna

Citation

Learjet
